# Publishable summary

This Project handbook is a guideline for the H2020 CEVOLVER projects (contract no.824295). It provides a short and comprehensive description of the management procedures, administrative aspects of the project, quality assurance procedures, the risk management approach, the progress monitoring procedures and any issue concerning confidentiality.

The CEVOLVER project management is based on a philosophy of management by objectives and risks, in which delegation of responsibility, communication, trust and realistic objectives are the key to the management structure. Partners – and in particular WP leaders - are requested to provide frequent feedback on their progress and any potential problems. The focus is on communication, cooperation and shared responsibility, as opposed to scrutiny and control. The overall goal is to identify problems early and undermine any negative (administrative, financial, technical, involvement and commitment and so on) effects efficiently and effectively, before unwanted consequences become unavoidable.
